In today's world, the wars let numerous people get into the trouble and make the barrier between the two countries; simultaneously, we even haven't found some effective solutions to deal with it. Consequently, I want to explore about this special event which we deserve to get more knowledges about.

I am of the opinion that wars effect the two aspects in our lives most. For one thing, wars impact people's lives seriously, for example, they let lots of people to be homeless, or make them hard to get foods and drink. Namely, the people who want to survive during the war usually die due to these main problem. For another, people sometimes will be attacked by their contrast country, since some countries even don't care about the safeties of people, they just want to get more prosperities by striking other countries, as a result, it makes people barely survive during the wars. these observations, I discover that many sorrowful things usually happened during the terrifying war. Sadness, not until any countries do something to prevent the wars, do wars bring lots of difficulties for us. Nevertheless, I still have some thoughts to deal with this problem.

If I were a world leader, I would do some methods to prevent the wars happened between countries, such as give more welfares to both countries, because whether the war happened sometimes depend on the people's attitudes to another country. I might also urge the two countries do more developments about the contrast country life, and they may have different thoughts about it. By these methods, the two countries may be good at another more, and I also sincerely hope that it will come ture in the lastly world, and bring more peaces and loves to this world.

Nowadays, the wars are still happened in many countries, how to get rid of the negetive result of all wars is still unknown.
